hardcore developer training

Agenda

- **Using ASP.NET MVC**
 - Creating the View
 - Using Forms
 - Validating Forms
 - Creating a Service
 - Using Dependency Injection
 - Bringing it Together
 - Using ActionLinks
 - Using Security

Summary

- **ASP.NET MVC**

- Creating a View from a Controller is easy and simple
- MVC allows you to build views that can submit data via Models
- Using ActionLinks can simplify linking to views without being fragile
- Security is a necessary evil, ASP.NET makes it easier to deal with
