**pluralsight**  
hardcore developer training

# Agenda

- **Starting from a Blank Canvas**
  - Using a Bootstrap Template
  - Creating the ASP.NET MVC Project
  - Importing the Template
  - Creating a Master Page in ASP.NET MVC
  - Creating a Home Page
  - Using Web Essentials

# Summary

- **We've Just Begun**

- Using a template can speed up your development speed.
- ASP.NET MVC includes many features you'll need for your back-end code
- Using a Master Page can simplify the markup of most pages you develop
- Web Essentials can supply crucial tools to make your site fast!
