hardcore developer training

What You Will Learn

- **To Build and Deploying a Website**

  - How to start a new website without requiring a designer

  - How to build individual pages

  - How to build a data model to store data

  - How to expose data through an API

  - How to build a Single Page Application for specific pages that need it

  - How to write tests to be sure your website is using quality code

  - How to deploy to a live server

What Will I Use?

- **Techniques and Technologies**

  - HTML5/JavaScript/CSS

  - Bootstrap

  - ASP.NET MVC

  - ASP.NET Web API

  - Entity Framework

  - AngularJS

  - Azure Websites

How the Course Works

- **Learn Through Observation**

  - See us build it

  - Understand the workflow and process

  - Make sense of how the different parts work together

Let's Get Started!
